Where intelligence meets vision

AIYRX Technologies is a Hyderabad-based technology and creative production business delivering practical digital products, operational systems, licensed software, AI-powered content and IT infrastructure support. We work with businesses, institutions, entrepreneurs and public-sector organisations in India and international markets.

01 - Discover	02 - Define	03 - Design
Understand the organisation, users, business problem, priorities and constraints.	Convert the idea into a structured scope, user flow, feature list and delivery plan.	Create a clear, mobile-ready experience or production plan aligned to the objective.
04 - Build	05 - Launch	06 - Support
Develop or produce in agreed milestones with transparent progress and approvals.	Test, deploy, deliver, document and hand over the approved outcome.	Provide optional maintenance, AMC, upgrades, licensing and ongoing support.

Final eight service divisions

AIYRX combines product engineering, business systems, creative production and practical IT support under one company. Services can be delivered individually or as an integrated engagement.

01 Software, Apps & Website Development

Custom software, mobile-ready applications, web platforms, portals and professional corporate websites.

02 SaaS, Cloud & Online Subscriptions

Scalable SaaS products, cloud platforms and subscription services designed for local and global users.

03 ERP, CRM & Business Automation

Billing, customer management, operations, workflow, reporting and organisation-specific automation.

04 Software Licensing & International IT Services

Software licences, white-label solutions, remote technology delivery and international project support.

05 AI Music & Audio Production

Original songs, brand jingles, voice production, narration, sound design, mixing and audio licensing.

06 AI Video, Advertising & Film Production

Advertisements, product videos, corporate films, short films, film concepts, editing and post-production.

07 Computers, Parts, Networking, Printers & CCTV

Business hardware, computer components, network equipment, printers, surveillance and installation support.

08 IT Support, Maintenance & AMC

Troubleshooting, upgrades, planned maintenance and annual support for business technology systems.

Government and public-sector engagement

AIYRX is open to websites, applications, portals, workflow systems, automation, infrastructure and custom-software opportunities for government departments, PSUs, municipal bodies and other public-sector organisations, including tender-oriented documentation, milestone approvals, testing evidence, handover and optional AMC terms.

AIYRX AI Studio

AIYRX AI Studio develops purpose-led music, audio and visual content for brands, products, institutions and original productions. Where displayed work is not commissioned client work, it is clearly identified as an AIYRX Concept Production.

AI Music & Songs

Original songs, campaign music and background scores.

Brand Jingles

Short-form sonic identities designed for brand recall.

Voice and Audio Production

Narration, voice-led content, sound design, mixing and mastering.

AI Advertisements

Concept-driven advertisements for digital and social campaigns.

Product Videos

Product demonstrations, launch films and feature-led stories.

Corporate Videos

Company profiles, explainers, presentations and communications.

Short Films

Original short narratives developed from concept to final cut.

Film Production

Creative development, scripting, visual planning and production support.

Editing and Post-production

Editing, motion graphics, colour finishing, sound and delivery masters.

Content Licensing

Clear usage terms for approved music, audio and visual productions.

AIYRX CONCEPT PRODUCTION

Original in-house capability samples. These are not presented as commissioned client projects unless expressly stated.

AIYRX Careers and Profit Pilot ERP

AIYRX develops its own digital products while also supporting candidates and employers through a dedicated career-services division.

AIYRX CAREER LAUNCH

Structured career preparation and employer connection support

Candidate services include skill assessment, resume preparation, AI mock interviews, interview training, verified job referrals and 90-Day Career & Employer Connect Support.

Employer services: vacancy submission, candidate sourcing, screening, interview scheduling and successful-hiring support.

AIYRX provides structured career preparation, employer connections and placement support. Final hiring decisions are made independently by the respective employer based on role requirements, interview performance and candidate suitability.
